Internship and Certifications

Newton School | Newton School Full Stack Web Development

September 2022 - April 2023

- Full Stack Web Development and Problem Solving.
- Technical Stack Learnt: **HTML, CSS, JavaScript, React, Data Structure and Algorithm and Java**
- Worked on various projects
- Participated in various coding competitions held by Newton School.

Education

B.A from University of Delhi

April 2018 – October 2021

Projects

watchBox | Newton School ([link](#))

August 2023 - September 2023

I'm excited to introduce my latest project, watchBox, a cutting-edge OTT (Over-The-Top) platform developed using React.js, HTML, CSS, and JavaScript. This project serves as a testament to my prowess in front-end web development and delivers an immersive and responsive streaming experience akin to leading OTT services.

Key Highlights:

- **Responsive Streaming:** watchBox ensures seamless streaming on all devices.
- **Protected Routes:** Secure content access for authenticated users.
- **Personalized Profiles:** Customize your viewing experience.
- **Watchlist:** Easily manage shows and movies to watch later.
- **Smart Recommendations:** Discover content aligned with your preferences.
- **Stunning UI:** A visually appealing, easy-to-use platform.
- **Effortless User Management:** Smooth log-in and log-out.
- **Profile Section:** Manage settings, view history, and set preferences.
- **Discover More:** Find similar content based on your interests.

Amazon Clone | Newton School ([link](#))

July 2023 - August 2023

I'm thrilled to present my latest project, an Amazon clone built using a combination of React.js, HTML, CSS, and JavaScript. This project showcases my skills in front-end development and offers a responsive web application that mirrors the Amazon shopping experience.

Key Features:

- **Responsive Design:** Responsive Design: Seamless shopping on all devices.
- **Efficient Search:** Easy product discovery.
- **Cart System:** Add, view, and adjust cart items.
- **Engaging Loader:** Realism and user engagement.
- **Amazon-like UI:** Familiar and intuitive design.
- **Firebase Authentication:** Secure user access.
- **Local Storage:** Persistent cart items.
- **Smooth Checkout:** Razorpay for secure payments.

Quotes generator ([link](#))

April 2023 – April 2023

The Random Quotes Generator is a simple and engaging web application that delivers daily doses of inspiration and wisdom through a collection of hand-picked quotes. This project is built using HTML, CSS, and JavaScript, showcasing the power of front-end web development.

Key features:

- **Randomized Quotes:** Generate fresh, inspiring quotes with a single click.
- **Author Attribution:** Know the source of each quote with author names displayed.
- **Twitter Share:** Easily share quotes on Twitter to inspire your followers.
- **Attractive Design:** A visually appealing and user-friendly interface.
- **Mobile-Friendly:** Responsive design for seamless mobile use.

Co-Curricular Activities

- Active participation in coding competitions showcasing strong coding skills and ability to perform under pressure.
- Participation in competitive sports, demonstrating teamwork, leadership, and a competitive spirit.
- Interested in art and designing, showcasing artistic talent and creativity.
